Campaign Settings / Filter Fields Selection

Who uses this section: **Campaign Administrators**

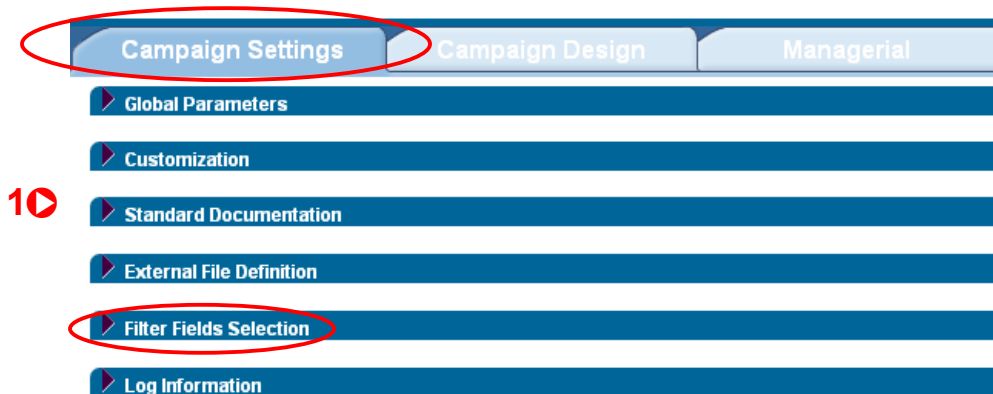

The **Filter Fields Selection** section is where administrators choose the information structures and fields that will be displayed as filter parameters during campaign target selection.

Using the Filter Fields Selection Section

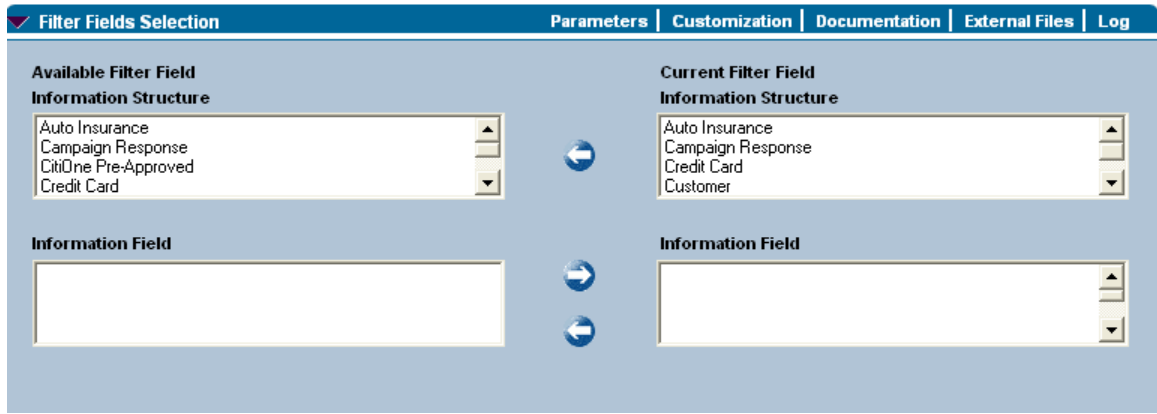

- [View existing information structures and fields](#)
- [Choose information structures and fields](#)
- [Remove information fields from current filter field list](#)
- [How this information is used](#)

View existing information structures and fields

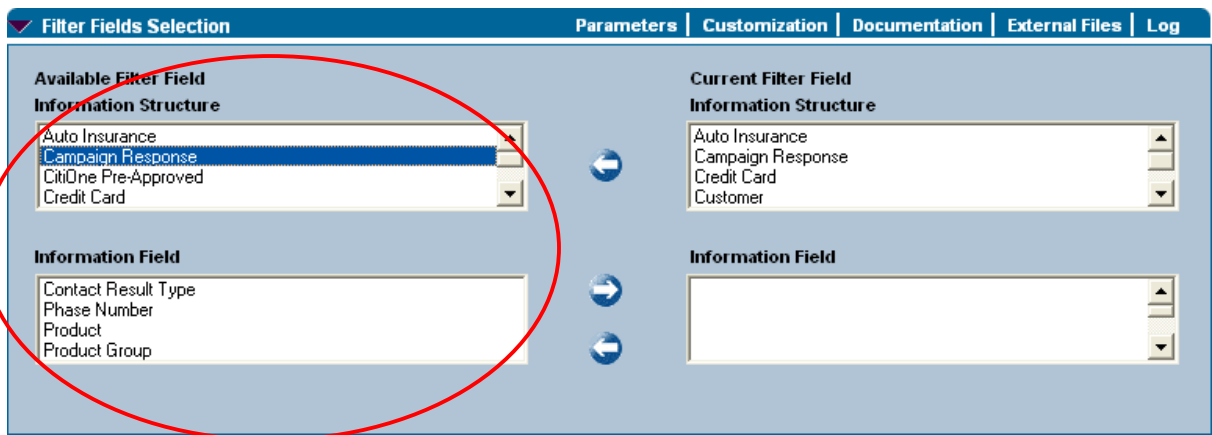

1. Click on the **Campaign Settings** tab on the top bar. Then click on the **arrow** on the **Filter Fields Selection** bar.

2. A new screen will appear. The available **Information Structures** will be visible in the **Available Filter Field / Information Structure** box.

3. To view the information fields for any of the available information structures, click on the information structure of your choice in the **Available Filter Field / Information Structure** box. This will cause the associated information fields to appear in the **Available Filter Field / Information Field** box.

4. To view the information fields for any of the current information structures, click on the information structure of your choice in the **Current Filter Field / Information Structure** box. This will cause the associated information fields to appear in the **Current Filter Field / Information Field** box.
